

Isolation Shut-Off Plates

Another Blend of Advanced Technologies for the Water Hydraulics Industry.

Save production time by replacing or repairing valves online while your hydraulic system is fully functional. No isolating all pressure, tank and workport lines and bleeding down the system.

Utilize the isolation plate to find cylinder by-pass problems and verify the integrity of the directional valve.

Part and Fluid Logic Model Numbers

D03 Size	303000
D05 Size	305000
D08 Size	308000
D10 Size	310000

Product Features:

Isolate any 4-way valve on-line in seconds to perform maintenance or cylinder troubleshooting. Allows entire valve to be removed or rebuilt on-line.

- 4 - Independent port shut-offs
- Quick ¼ turn operation
- Each port standard with lock-out plates
- Chromed and stainless steel internals
- Housings are melanited for corrosion resistance
- Standard NFPA sizes – D03, D05, D08 & D10
- Other competitive interfaces available

D10 Isolation Plate

D08 and D05 Isolation Plates
